## Seminar on remote sensing

**Kochi:** In an attempt to utilize the global expertise for effectively making use of satellite data for the development of India's marine fisheries sector, the Central Marine Fisheries Research Institute (CMFRI) will host an international symposium SAFARI (Societal Applications in Fisheries and Aquaculture using Remote Sensing Imagery) from January 15 to 17 in Kochi. Around 300 delegates from across the globe will attend the symposium that will have 10 technical sessions.

"The symposium will explore ways to apply the remote sensing techniques in the areas such as aquaculture harvest fisheries management and fresh water, estuarine and marine fisheries," said A Gopalakrishnan, director, CMFRI. Trilochan Mohapatra, secretary, department of agricultural research and education and director general of the Indian Council of Agricultural Research will inaugurate the symposium at 10 am on Monday. **TNN**
