Preface

Data is the *sine qua non* of good governance and data generation is a formidable task. Though conducting the National Marine Fisheries Census 2016 has been a challenging endeavour, we at ICAR-Central Marine Fisheries Research Institute are bestowed with such rich experience and vast expertise in big data management including the first survey of marine fishing villages and marine fish landings centres carried out during 1948-'49, that, this mammoth task could be accomplished as a remarkably rewarding as well as enriching achievement. While the huge, but systematic data base generated is of utmost significance for governance-oriented decision making at the Central as well as State levels, the process itself has offered us unique opportunities for strengthening our bonds with the stakeholders—the large majority of fishers in remote, mostly under-developed and environmentally challenged coastal villages. Despite the hardships, our staff members had to endure during the enumeration, the exercise could be taken to its logical end only because of the whole hearted cooperation extended by the fisherfolk and allied stakeholders of the nation.

I am happy to acknowledge the immense support and interest shown by the fisherfolk and allied stakeholders of the state who patiently provided all the required information to our staff members on the census job. The interface was well-mediated by the equally helpful assistance from the officials of the Department of Fisheries, Maharashtra. Having conducted the Marine Fisheries Census in 2005 and 2010 with due funding support from the then Department of Animal Husbandry, Dairying and Fisheries (DADF), Government of India, we were well equipped to address any operational issues that may crop up during enumeration. Nevertheless, our staff members were provided with sufficient skill enhancement trainings, well prior to their systematic deployment in the field. It is pertinent to provide a glimpse into the kind of preparations we have undertaken for this exercise. Across the nine maritime states and two union territories, we developed census data collection forms in different languages, dispatched them to different centers, printed notices in vernacular languages, gave media circulation, coordinated census enumeration at all the locations,

made necessary supervisions, collected the forms back and finally brought them to the headquarters at Kochi for data digitization and data processing. The National Marine Fisheries Data Centre of ICAR-CMFRI coordinated the data entry, compilation and analysis. The entire scientific, technical, administrative and supporting staff of the Fishery Resources Assessment Division ably led by the division Head, Dr. T. V. Sathianandan, who made remarkable contributions in coming out with the census reports. Special thanks are due to all the scientific, technical, administrative and supporting staff of ICAR-CMFRI for their sincere involvements in the successful conduct of the census.

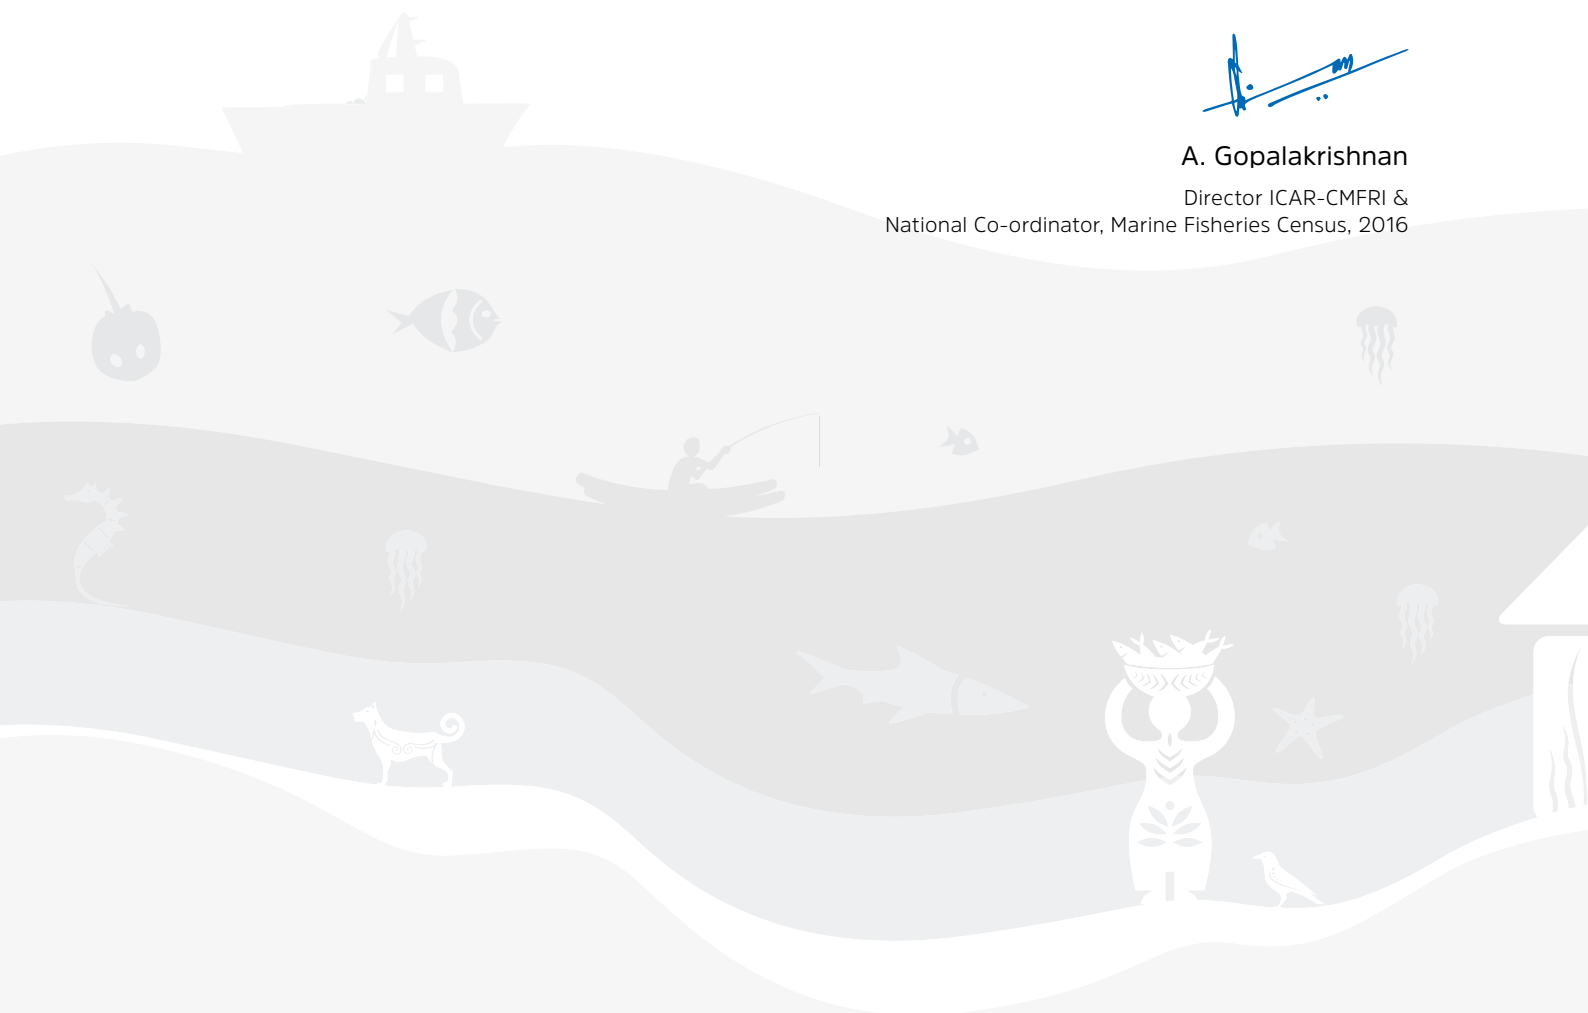

Once again, I am expressing my sincere thanks to the DADF, Govt of India (presently the Department of Fisheries – DoF) who supported by funding the census programme, ICAR officials who encouraged the activities, the entire CMFRI fraternity whose enthusiasm made this task a commendably collective feat.

Finally, I sincerely thank the Scientist-in-Charge, Mumbai Research Centre of ICAR-CMFRI and all other staff for the support and help rendered in completing the Marine Fisheries Census 2016 successfully. I am sure this report will be of enormous use to all associated with the development of marine fisheries sector.

A. Gopalakrishnan

List of marine fishing villages 251

List of landing centres259

Summary

Marine Fisheries Census 2016 was carried out during the time stamp February 2016 and it encompassed all the districts of coastal Maharashtra, reorganized to be seven from the earlier five viz. Palghar, Thane, Mumbai Suburban, Mumbai City, Raigad, Ratnagiri and Sindhudurg. The scope, methodology, reference interregnum and connotation and sense of terms used in the report may be seen in detail in Marine Fisheries Census 2016 India Report. The salient summarised information collected through this exercise given below.

Fishing villages and landing centres

- Maharashtra state comprises 526 villages earmarked as marine fishing villages across the seven districts.
- Raigad accounted for a maximum of 195 villages and Mumbai City, an urban agglomeration, had the least (9). While Mumbai Suburban and Thane account for lesser number of fishing villages, other coastal districts including the newly carved out Palghar had more than 70 villages each.
- Similar pattern is reflected in landing centres too with Raigad and Ratnagiri accounting for 35 each out of the total 155 landing centres/ fishing harbours. As expected, the districts with more urban landscape have the less number of landing centres.

Population

- The coastal districts of Maharashtra account for 87,717 families, where at least one member of them is involved in marine fishing and/or allied activities, with a headcount of 3,64,899 making up these families.
- Raigad have a maximum of 27,676 families, with Palghar coming a close second with 22,837 households. Ratnagiri is a distant third with 16,696 families, while the rest were less than 10,000 families, with Mumbai City accounting for the least (1,827).
- Population wise, Raigad and Palghar contribute to the tune of 31.2% and 25.9% respectively, with Mumbai City chipping with the least at 2%. Among the recorded 87,717 fishermen families, 80,906 (92.2%) belong to those who ancestrally and traditionally been taking up this avocation.
- The average per village number of families is 167 and per village fisherfolk is 694.
- The average family size of the state is 4 which is same for all the districts.
- While studying the population profile of these fishing families, it is noted that children constitute 28.4% of the populace and amongst the adults, males account for 50.1% and the remaining being females.

- The number of females per 1,000 males for the state is recorded as 966, with a maximum of 1,028 in Mumbai City and a minimum of 935 in Sindhudurg.

Poverty

- The state has 27,400 families falling in the BPL category as per government norms, which was recorded based on the family ration cards issued. This means that every third marine fishermen family (31%) is falling under the BPL category.
- Highest number of such families is recorded in Raigad (7,917) and the lowest is in Mumbai City (638). Per thousand families this ratio is highest in Mumbai Suburban (840) and lowest in Ratnagiri (200).

Education status

- In Maharashtra, 76.0% of eligible marine fishermen population is found formally educated at various levels starting from primary education to graduation and above.
- Amongst those who have underwent schooling, 39.6% have primary level education, while the extents for above primary upto secondary, above secondary up to higher secondary and graduation are 48.3%, 8.5% and 3.6% respectively.
- The uninitiated account for 24% amongst the eligible age group.

Occupation

- The state records 76,928 active fishermen of whom, 75,773 are into core fishing out in the sea amongst whom a group made up by 79.5% are full time active fishermen venturing into the sea for more than six months in a year and the rest part-time, who are into seasonal fishing. The rest, 1,155, were involved in fish seed collection.
- Among those who earn their livelihood primarily from marine fishing and allied activities numbering

1,71,780, the active fishermen account for 44.8% and the rest are involved in allied activities (94,852).

- The breakup of the allied activities is as follows: Marketing (59.62%), making/repairing net (5.3%), curing/processing (6.54%), peeling (3.76%), labourer (11.58%) and rest (13.2%).
- Womenfolk dominated marketing (94%), curing (96%), peeling (93%) and sundries (66%), while men are more involved in net handling (72%) and as labourer (70%). A district-wise profile lead to the following snippets: Marketing is at its high in Raigad (34%) and the least in Mumbai City (3%); Net handling is a major avocation in Raigad and Palghar (32%), whereas peeling, processing and curing are more prevalent in Raigad and Palghar, with the former dominating peeling and the latter, curing. As regards labour contribution at the landing points, the scenario is similar, with Raigad (39%) and Palghar (29%) dominating the proportional profile.

Religion

- Going by the religious faith, Hinduism is the dominant one with 72,179 families (81.9%) following it; Islam and Christianity have 10% and 8% of the families following them respectively. Other faiths constitute 0.1%.
- Hinduism is the dominant faith in all the districts, with Ratnagiri having Islam along with Hinduism dominating the religious profile.
- The SC/ST families are 5,161 in number, which is 6% of the total fishermen families. This is the highest in Raigad district (12%) and the lowest in Sindhudurg (1%).

Membership in co-operatives

- Among the adults, a total of 84,308 were members of some co-operative setup. This forms around 32% of the eligible population amongst fishermen families of the state.

- Of these, 86% are primarily members in fisheries co-operatives. Approximately 14% of membership is with other co-operative societies. This membership proportion in fisheries co-operatives is the highest in Mumbai suburban (99%) and the lowest in Thane with 48%.

Fishing crafts in the fishery

- In Maharashtra, a total of 15,520 fishing crafts are observed in action at the fishing points, which comprise a meagre 2,865 of non-motorized type followed by 5,867 of mechanized type and the rest, the maximum chunk, 6,788 using motor for propulsion only type (motorised).
- Amongst the mechanized crafts, 3,408 are trawlers and the motorised sector is dominated by inboard type crafts (5,979). The bulk of mechanized crafts are listed in the districts of Mumbai City, Ratnagiri and Palghar in that order.
- Sindhudurg accounts for only 192 mechanized units, which is a bit distinct from the rest of the districts.
- Amongst the total 3,408 trawlers, Mumbai City accounts for 42% followed by Ratnagiri with 30%. Thane had no trawlers attributed to its landing points in action.
- Amongst other mechanized crafts, dolnetters are found maximum in Palghar (827), next by Mumbai Suburban (495) with Thane's 293 dolnetters forming a distant third.
- Purse seiners have their mainstay in Ratnagiri going with the traditional pattern.
- Gillnetters are mostly shared between Thane (264) and Palghar (247).
- Amongst the motorized units, maximum are found operated from Raigad (2,608) followed by Sindhudurg (1,223). They are the least in Thane followed by Mumbai City, whose seascape is dominated by mechanized units.

- Amongst the 2,865 non-motorized units in the fishery, Ratnagiri (734) and Raigad (659) are the major districts with Mumbai Suburban (592) breathing down their necks.

Craft owned by the fisherfolk

- Out of a total of 19,913 units fully owned by the fishing households residing in the designated fishing villages, 10,458 are of non-motorized type, 1,332 are of outboard kind, 5,248 are of inboard type and 2,875 falling under mechanized crafts categorization.
- Under fully ownership pattern, trawlers (46%) followed by dolnetters (30%) form the major chunk amongst mechanized category.

Infrastructure

- The proportion of marine fishermen families residing in *pucca* houses in Maharashtra is 91%.
- All the marine fishing villages have electrification, while the percentage of electrification in the portions occupied by the families as on 2016 was 99%.
- There are 756 primary schools (Raigad (254) maximum), 266 secondary schools (Raigad-120), 58 colleges (Raigad-19) and 35 technical institutions (Raigad-23) listed in the fishing villages.
- With maximum number of villages and landing centres, Raigad district tops in the educational infrastructure also.
- With regard to locally situated fishery related facilities, there are 17 boat yards, 5 cold storages, 107 ice factories, 19 freezing plants and 14 processing plants accessible to these 526 fishing villages in the state.
