THE BULLETIN OF THE CENTRAL MARINE FISHERIES
RESEARCH INSTITUTE IS PUBLISHED AT IRREGULAR
INTERVALS AS AND WHEN INFORMATION OF A GENERAL
NATURE BECOMES AVAILABLE FOR DISSEMINATION.

FOREWORD

The Central Marine Fisheries Research Institute in the course of over two decades since its inception in 1947, has published the work done by a large number of scientific staff at the headquarters station and the outstation establishments in varied periodicals, memoirs, proceedings of the occasional symposia conducted by the world organisations etc., the total number of publications amounting to about a thousands, covering a wide range of topics in the fields of fishery biology, marine biology, physiology and other related disciplines. The need for an up to date list of publications for ready reference has been keenly felt by the scientific workers of this Institute and other organisations. This bulletin has been prepared by Shri K. Kanakasabapathi of the Institute in addition to his normal official duties. I place on record my appreciation of him for carefully compiling and indexing the list with meticulous care.
