

Collection of marine mammals from Mangalore

Tissue samples from a total of 12 individuals of 2 cetacean species (Indo-Pacific humpbacked dolphin, *Sousa chinensis* and finless porpoise, *Neophocoena phocaenoides*) landed along Mangalore coast were collected, mtDNA amplified and PCR products (cyto-chrome b and control region) sequenced. This collection was a part of inventORIZATION of marine mammals from the Indian seas. (PNP Division & FEM Division)

Humpbacked dolphin

Finless Porpoise
