F O R E W O R D

The International Indian Ocean Expedition has given much stimulus to marine work in Indian Ocean countries. There is special interest in the study of marine plankton with a view to understanding areas of high and low productivity. An Indian Ocean Biological Centre at Ernakulam, near Cochin, has been set up by the Council of Scientific & Industrial Research with UNESCO assistance, for receiving and sorting the several hundreds of samples of plankton collected with the Indian Ocean Standard Net operated by research ships participating in the Expedition. It is hoped that the bibliography of work relating to plankton of Indian Ocean prepared by Dr. Prasad will be useful to students of marine biology and particularly to those who desire to take up intensive studies on Indian marine plankton.

A BIBLIOGRAPHY OF PLANKTON OF THE INDIAN OCEAN

By

R. RAGHU PRASAD

(Central Marine Fisheries Research Substation, Ernakulam)

INTRODUCTION

More than a decade back a bibliography of plankton of the western sector of the Indo-Pacific region was compiled by the staff of the Central Marine Fisheries Research Institute and was issued as Occasional Paper 51 of the Indo-Pacific Fisheries Council. Since the publication of this, a large number of papers relating to plankton of the Indo-Pacific region have appeared and with the commencement of the Indian Ocean Expedition the need for revising the earlier bibliography was keenly felt. At the suggestion of Dr. N. K. Panikkar, Director, Indian Programme of the Indian Ocean Expedition, the author undertook the task of preparing a bibliography of plankton of the Indian Ocean.

The author is fully aware of the magnitude of the work as well as the limitations of the present compilation. No claim is made of having given complete coverage owing to the limited library facilities under which this compilation had to be made and so it is likely that there will be omissions, particularly some of the very early publications and those which might have appeared in some of the obscure journals.

The references are arranged subjectwise and all publications dealing with plankton as a whole have been grouped under 'General'. Since some of the references given under the various groups include more than one group, cross references as far as possible are given at the end of the sections.

The author is grateful to Dr. S. Jones, Director, Central Marine Fisheries Research Institute for permission to publish this and also for his help and advice particularly regarding the section 'Fish eggs and larvae'. Thanks are also due to Dr. R. P. Varma and Shri P. V. Ramachandran Nair for checking the section 'Phytoplankters' and Sarvashree K. Rengarajan and Clement Adolph for help rendered in collecting some of the references. To Dr. N. K. Panikkar, the author is grateful for arranging the publication.

 1963. Synopsis on the biology of the bigeye tuna *Parathunnus mebachi* Kishniouye 1923 (Indian Ocean). *Ibid.*, No. 6, 2, 350-379.
40. SILAS, E.G.
 1963. Synopsis of biological data on double-lined mackerel *Grammatocyrinus bicarinatus* (Quoy and Gaimard) (Indo-Pacific). *Ibid.*, No. 6, 2, 811-833.
41. SILAS, E.G.
 1963. Synopsis of biological data on oriental bonito *Sarda orientalis* (Temminck and Schlegel) 1842 (Indian Ocean). *Ibid.*, No. 6, 2, 834-861.
42. WILLIAMS, F.
 1963. Synopsis of biological data on frigate mackerel *Auxis thazard* (Lacépède) 1802 (Indian Ocean). *Ibid.*, No. 6, 2, 157-166.
43. WILLIAMS, F.
 1963. Synopsis of biological data on little tuna *Euthynnus affinis* (Cantor) 1850 (Indian Ocean). *Ibid.*, No. 6, 2, 167-179.
44. YOSHIDA, H.O. and T. OTSU
 1963. Synopsis of biological data on albacore *Thunnus germea* (Lacépède) 1800 (Pacific and Indian Oceans). *Ibid.*, No. 6, 2, 274-318.

PLANKTON AND FISHERIES

45. PRASAD, R.R.
 1963. The role of marine biology in fisheries research. *Indian Livestock*, 1(2), 32.

PRODUCTIVITY

46. PRASAD, R.R. and P.V.R. NAIR.
1963. Studies on organic production—I. Gulf of Mannar. *J. Mar. biol. Ass. India*, **5**, 1-26.
47. SAIJO, Y.
1963. Problems in the study of primary production in the sea. *Inform. Bull. Planktol. Japan*, No. 10, 9-16.
48. SAIJO, Y.
1963. Techniques of primary production measurements used on the Indian Ocean cruise of the "Umitaka Maru" December 1962-January 1963, and suggestions on their improvement on the next cruise. *Ibid.*, No. 10, 17-22.
