PREFACE

A bibliography was published in April, 1986 listing the publications of the staff of the Central Marine Fisheries Research Institute from 1948 to 1985. Since then voluminous literature have been produced by the staff of the Institute which called for, within a short period, the updating of the bibliography . The present bibliography published as Part-2 of the earlier one, incorporates all the publications of the staff for the five year period from 1986 to 1990.

A total of 1162 titles have been listed in the present volume including 66 titles pertaining to some years prior to 1986 which could not find place in the earlier bibliography. Every effort has been taken to incorporate all the titles published upto 1990, but still some would have been left out inadvertently which could be taken care of in the subsequent number. The serial number given in this volume is the continuation from the preceeding issue. In order to facilitate better utilization, in addition to the author index, a subject index has also been included at the end. It is hoped that the bibliography will be found useful by all those interested in the field of marine sciences.

I appreciate the efforts made by Dr. K. J. Mathew, Mr. V. Mohan and Mr. K. Kanakasabapathy in compiling this volume with great care.
